

Maine Government Priority KPI Report

Purpose

This report converts the statewide ACS town layer into a public-sector KPI screen. It is built to help Maine agencies ask where scarce housing, mobility, health, broadband, climate, workforce, and basic-needs investments may have the strongest local case.

Questions This Helps Answer

- Which towns should be first in line for transportation equity and last-mile mobility planning?
- Which towns show the strongest housing affordability, seasonal-pressure, or production-planning signals?
- Where will aging-in-place, disability access, and rural healthcare coordination matter most?
- Which towns should be watched for broadband and digital-equity intervention?
- Where do food/basic-needs stress and family-service demand overlap?
- Which towns are practical workforce-support hubs because housing, commute, childcare/family, and digital gaps collide?
- Where can climate-aware growth reduce car dependence and long commute pressure?

KPI Model

KPI	Government Question
Housing pressure	Where are affordability, cost burden, and seasonal/vacant pressure likely to constrain households or housing production?
Transportation equity	Where do no-car households, long commutes, poverty, age, and disability make mobility investment most urgent?
Aging in place	Where will older adults need accessible homes, healthcare coordination, senior transportation, and digital support?
Digital equity	Where do no-internet/no-subscription households overlap with poverty, age, disability, or rural service gaps?
Health access pressure	Where do age, disability, poverty, no-car households, and rural distance create healthcare-access vulnerability?
Food/basic needs	Where do poverty, no-car households, children, disability, and age suggest higher basic-needs pressure?
Workforce support	Where do housing burden, long commutes, children, poverty, and digital gaps weaken workforce growth?
Climate mobility opportunity	Where can compact growth, lower-emission commuting, and mode shift reduce transportation burden?

Interpretation Notes

- These are screening KPIs, not final program eligibility decisions.
- ACS county-subdivision data is strongest for statewide triage and weaker for very small places with high margins of error.
- The next data upgrades should add statewide transit service, local housing permits/parcel prices, flood risk, broadband fabric or BSL availability, healthcare facility travel times, food access, school/childcare locations, and local tax/capital-plan data.

Source Context

- U.S. Census Bureau ACS 2024 5-year table-based Summary File: town population, income, poverty, zero-vehicle households, age 65+, disability, children under 18, housing cost burden, seasonal/vacant housing, commute mode, long commutes, work-from-home, and household internet access.
- MaineHousing, State of Maine Housing Production Needs Study: Maine needs more housing supply and better alignment between housing location, economic opportunity, and quality of life. https://www.mainehousing.org/docs/default-source/default-document-library/state-of-maine-housing-production-needs-study_full_final-v2.pdf
- MaineDOT, Maine 2024-2028 Locally Coordinated Plan: transit needs assessment focuses on the general public, individuals with disabilities, older adults, low-income people, and people without access to a vehicle. <https://www.maine.gov/dot/programs-services/transit>
- Maine DHHS, 2024-2029 State Health Improvement Plan: priority areas include healthy/stable housing and equitable access to care. <https://www.maine.gov/dhhs/mecdc/ship/>
- Maine DHHS/OADS, State Plan on Aging 2025-2028 and Age-Friendly State Plan: older adults and adults with disabilities need coordinated, livable community supports. <https://www.maine.gov/dhhs/oads/about-us/policy-planning>
- Maine Connectivity Authority, Digital Equity Plan: digital opportunity work targets older adults, veterans, low-income families, rural residents, people with disabilities, and minority populations. <https://www.maineconnectivity.org/digital-equity>
- Maine Department of Economic and Community Development, 2024 Economic Development Strategy Reset: workforce growth depends on supporting infrastructure such as housing, childcare, transportation, broadband, and local hubs. <https://www.maine.gov/decd/strategic-plan>
- Maine Climate Plan: future communities need lower-emission transportation choices, compact growth, climate-aware housing, and resilience. <https://www.maine.gov/climateplan/the-plan>
- HUD Location Affordability framing: housing decisions are stronger when transportation cost and access are evaluated together.
