

Maine Statewide Future Livability And Investment Screening Report

Bottom Line

- Maine places analyzed: 518 ACS county subdivisions.
- Top statewide livability screen: Cumberland, Cumberland County.
- Top statewide opportunity screen: Portland, Cumberland County.
- Highest essential-needs pressure screen: Moro, Aroostook County.
- This statewide report is ACS-only. It is good for screening all Maine towns, but it does not yet include parcel prices, zoning, flood risk, broadband, school quality, crime, GTFS service, or local tax data.

How To Read This Like A Visionary Realtor Or Investor

- Future livability favors stronger income, lower poverty, lower zero-car vulnerability, lower disability pressure, balanced age structure, and enough population scale for services.
- Investor opportunity favors larger population, higher service demand, aging demand, income capacity, and visible unmet needs; tiny places are downweighted so the ranking better reflects practical market scale.
- Essential-needs pressure highlights towns where American households may need more affordability, mobility, healthcare, senior services, accessibility, or workforce support.

Westbrook	Cumberland	65.7	48.61	42.69	20,775	\$85,038	balanced residential growth, local retail, and commuter/workforce services

What This Adds To The Project

The earlier reports answer detailed Greater Portland mobility questions. This statewide layer answers a different first-pass question: where in Maine should someone look if they care about future living quality, investment opportunity, or unmet community needs?

Source Context

- U.S. Census Bureau ACS 2024 5-year table-based Summary File: town population, income, poverty, zero-vehicle households, age 65+, and disability.
- MaineHousing, State of Maine Housing Production Needs Study: Maine needs more housing supply and better alignment between housing location, economic opportunity, and quality of life.
- Maine Department of Economic and Community Development, 2024 Economic Development Strategy Reset: workforce growth depends on supporting infrastructure such as housing, childcare, transportation, broadband, and local hubs.
- Maine Climate Plan: future communities need lower-emission transportation choices and climate-aware growth.
- HUD Location Affordability framing: housing decisions are stronger when transportation cost and access are evaluated together.
